

In the event of an Earthquake or Wild Fire are you Prepared and READY?

- **Be Ready!** Are you Firewise / Earthquake ready?
- **Be Set!** Do you have a plan?
- **Go Early!** If you are Firewise ahead of time and have a plan in place, you won't have to wait for the emergency call or knock at the door. Evacuate when ordered to leave so firefighters can do their jobs more effectively.

Plan and be prepared by having the following ready should there be an emergency:

- **People and Pets-** Have a plan. Do you know at least two ways out of your community? Where will you meet family after evacuation? Where will you stay and how will you contact each other? Where will your pets stay? Equestrian Center Large Animals plan for trailer, food, shelter.
- **Papers, phone numbers, and important documents.** Deeds, birth certificates and other irreplaceable documents should be in one location so these can be grabbed at a moment's notice.
- **Prescriptions, eyeglasses, and vitamins.** You may be gone from your home for days, so insure you have access to all your health related items.
- **Pictures and irreplaceable memorabilia.** These are priceless and could be lost forever.
- **Personal computers or any information stored on hard drives and disks.**
- **Plastic including credit cards, ATM cards and cash.**
